Virginia Workforce Letter: Subject - Virginia Workforce Connection System of Record

Virginia Workforce Letter: Subject - Entry of Case Notes in VaWC

Virginia Workforce Letter: Subject - VaWC Electronic Case Record

REVISION HISTORY:

Rescinds/Replaces Virginia Workforce Letter No. 14-01, Subject: WIOA Participant Activity Code Definitions, Projected Durations and Use Projection Limitations.

Rescinds/Replaces Virginia Workforce Letter No. 14-06, Subject: Service Extensions in the Virginia Workforce Connection (VaWC)

BACKGROUND:

The Department of Labor's 2019 review of Virginia's Workforce System included a finding that Adult and Dislocated Worker participants are not exited in accordance with ETA guidance. Staff were arbitrarily extending service codes for no other apparent reason than to delay a participant's exit. In addition, staff were not sufficiently documenting any justification for entering or extending certain service codes. This VWL is intended to address this finding by providing both definitions for the WIOA activity codes and provide guidance on their appropriate use. This VWL is meant to further refine the accuracy and utilization of activity codes in serving WIOA participants.

GUIDANCE:

The standardized definitions of WIOA Title I Service codes is meant to assist the local areas in accurately recording participant activities. The purpose of defining Projection Limitations is not to restrict the local areas in their ability to serve participants, but to ensure that events related to those activities are recorded in the proper sequence and according to DOL policies and guidelines for accuracy and timeliness. A major concern of the WIOA program is the accuracy of services reported in the Participant Individual Record Layout (PIRL), other projects that have been noted by the Government Accountability Office (GAO), U.S. Department of Labor's Employment and Training Administration Office of the Inspector General and several data initiatives at the State level. Furthermore, the Virginia Board of Workforce Development has increased its review of data and involvement in WIOA-related accountability issues.

What is "Projection Limitation" in the Activity Code Definitions?

The term "Projection Limitation" refers to the projected end date associated with a service code that is keyed within the VaWC and applies to one or both of the following circumstances for all Activity Codes. The purpose of the service Projection Limitations listed within this document is to prevent services from being projected indefinitely into the future, without sufficient justification and used simply to delay or prevent a Participant's exit from the program while staff are attempting to make contact with the Individual or collect information. The services listed in this document are staff assisted activities and it is expected that the staff are actively engaged in assisting the participant unless it is otherwise listed within the definition of that specific activity.

Service codes are not to be used simply to prevent the exit or keep a record open.

Time Limit for an Activity Code – the period that an activity code may be projected to last or the period of time the service can remain active/open without review within the VaWC. It does not refer to the entire duration of the activity itself. For example, Activity 300 – Occupational Skills Training, can be entered initially into VaWC and projected to end as many as 90 days beyond the actual start date of the activity. At the end of the **initial** 90 day period, the case is to be reviewed and the projected end date

may be extended an additional 90 days, or fewer days as appropriate, if the participant is still involved in that activity. The review and update of this activity code's projected end date continues for as long as it is applicable and appropriately documented within the system for the participant's situation.

All extensions must be documented by a detailed Case Notes within the Virginia Workforce Connection (VaWC).

WIOA Case Management is a collaborative process of assessment, planning, facilitation, coordination and evaluation of options and services to meet an individual's specific set of circumstances. There is also an important connection between case notes, planning, and implementation that help address related issues in an effort to ultimately drive the program toward successful outcomes. The process should entail coordinating, tracking, and reporting customer activities and services and these efforts should be recorded within the management information system of record, the Virginia Workforce Connection (VaWC).

The case management process includes adding case notes to the record that provide specific details related to the staff involvement with the participant, as well as additional information related to the situation, strategy and/or service provided. Case notes are required to be added to the VaWC system as services are provided, updated, and extended. These notes should provide details that identify the circumstances surrounding the provision of service and the use for the specific service code. The note should include a description of the assistance provided to the participant that reflects a partnership between staff and the individual. Depending on the situation, a case note should include:

- a description of the individualized conversation;
- activity provided to the participant to address his/her goals or objectives;
- progress toward goals and;
- details related to how staff provided assistance and the purpose for extending the activity.

Restricted Use of certain Activity Codes.

Certain activity codes may only be used for a particular segment of an individual's specific program participation or only under certain circumstances and these conditions are documented within the definitions of each activity.

For example, Supportive Services – Transportation", may be provided to Adult and Dislocated Workers participants enrolled in WIOA Title I activities. Another example would be that only WIOA Youth program participants have access to the Youth Program elements and these activities are in the 400 level or category of service.

Service/Activity Codes

001 – Hold, waiting for activities or health/medical – This code is used to identify and highlight a **planned** and **temporary** break in the participants Individual Service Strategy (ISS) or Employment Plan. Holding **may not** exceed 90 days except when there is a regularly scheduled break in training that exceeds the 90-day limit. Examples include summer recess, semester breaks or under documented extenuating circumstances from a third party based on the participant's situation such as being under medical care, class schedule change, etc.

Examples include:

- Delay before the beginning of training;
- Health/medical condition or providing care for a family member with a health/medical condition; and
- Temporary move from the area that prevents the person from participating in services, i.e. National Guard or other related military Services.

The participant's record should include a detailed case note within the VaWC that includes circumstances surrounding the individual's status and also the details related to scheduled and future activities.

This activity code does not extend Program Participation and is not included in the Soft Exit Calculation/Extension. This code must be used in conjunction with either an existing open activity, or with an activity scheduled to start in the future.

A case note should be created for this activity explaining the reason for such a gap in service.

Projection Limitation: May not exceed 90 calendar days and must be documented.

Adult & Dislocated Worker Services

Basic Career Services - Basic career services are universally accessible and must be made available to all individuals seeking employment and training services in at least one comprehensive American Job Center per local area. Generally, these services involve less staff time and involvement and include services such as: eligibility determinations, initial skill assessments, labor exchange services, provision of information on programs and services, and program referrals. These services may be provided by both the Adult and Dislocated Worker programs, as well as by the Employment Service.

Individualized Career Services - Individualized career services must be provided to participants after American Job Center staff determine that such services are required to retain or obtain employment, consistent with any applicable statutory priorities. Generally, these services involve significant staff time and customization to each individual's need. Individualized career services include services such as: specialized assessments, developing an individual employment plan, counseling, work experiences (including transitional jobs), etc.

The Adult and Dislocated Worker Services documented below are considered activities that would "Trigger Program Participation" or "Extend Program exit" unless otherwise noted within the service definition.

Career coaching is the process of helping a jobseeker define a course of action or study to become more employable and ultimately obtain a job. This process includes Staff activity and actions that help the jobseeker get into a career that is suited to their aptitude, personality, interests, and skills. The focus is generally on issues such as career exploration, career change, personal career development, and other career-related issues.

A case note must be recorded when entered and each time the projected end date is extended. The case note should include details related to any guidance and/or career coaching the staff provided to the participant, in addition to determining whether more intensive services may be required to obtain employment. This could include the development of a plan (not necessarily a written plan) that includes the necessary steps and timetables to achieve employment in specific occupational, industry, or geographic area.

NOTE: This is a staff assisted activity and it is expected that the staff are engaged in assisting the participant, not simply checking on the individual’s self-directed job search. This Service code is not to be used simply to prevent the record from Exiting. A Detailed Case note must be added anytime this service is extended.

Projection Limitation: Not to exceed 30 calendar days.

Adult & Dislocated Worker Supportive Services

Supportive services for adults and dislocated workers include services such as transportation, child-care, dependent care, housing, and needs-related payments necessary to participate in WIOA activities. Local Workforce Development Boards, in consultation with the Virginia Career Works Center partners and other community service providers, must develop a policy on supportive services that ensures resource and service coordination in the local area. Such policy should address procedures for referral to these services, including how the services will be funded when they are not otherwise available from other sources.

Supportive services may include, but are not limited to:

- Assistance with transportation;
- Assistance with childcare and dependent care;
- Linkages to community services;

When may supportive services be provided to participants?

Supportive services may only be provided to persons who are participating in WIOA Title I Activities; **and** must be necessary to enable the individual to participate in career services or training activities. Staff should attempt to identify other resources available to fund supportive services when possible. If other funding or resources are available, staff must provide a detailed case note of options reviewed and considered, and why those resources are not available to justify using WIOA Title I funding as the last resort.

Are there limits on the amounts or duration of funds for supportive services?

Local Workforce Development Boards (LWDBs) may establish procedures on the provision of supportive services or provide the Virginia Career Works Centers with the authority to establish such limits, including a maximum amount of funding and maximum length of time for supportive services to be available to participants.

Adult & Dislocated Worker Training Services

Training Services. Training services can be critical to the employment success of many adults and dislocated workers. Training services are governed by sections 20 CFR 680.200 through .230 and 20 CFR 680.300 through .350 of the WIOA Final Rule. American Job Center staff may determine training services are appropriate, regardless of whether the individual has received basic or individualized career services first, and there is no sequence of service requirement.

Under WIOA, training services may be provided if the American Job Center staff, including partner programs' staff, determines after conducting an interview, an evaluation, or assessment, and career planning, that the individual:

- Is unlikely or unable to obtain or retain employment that leads to economic self-sufficiency or wages comparable to or higher than wages from previous employment through career services alone;
- Is in need of training services to obtain or retain employment that leads to economic self-sufficiency or wages comparable to or higher than wages from previous employment;
- Has the skills and qualifications to successfully participate in the selected program of training services;
- Is unable to obtain grant assistance from other sources to pay the costs of such training, including such sources as State-funded training funds or Federal Pell Grants established under title IV of the Higher Education Act of 1965, or requires WIOA assistance in addition to other sources of grant assistance, including Federal Pell Grants (20 CFR 680.230 and WIOA sec. 134(c)(3)(B) contain provisions relating to fund coordination.);
- Is a member of a worker group covered under a petition filed for Trade Adjustment Assistance (TAA) and is awaiting a determination. If the petition is certified, the worker may then transition to TAA approved training. If the petition is denied, the worker will continue training under WIOA;
- Is determined eligible in accordance with the State and local priority system in effect for adults under WIOA sec. 134(c)(3)(E) if training services are provided through the adult funding stream; and
- Selected a program of training services that is directly linked to the employment opportunities in the local area or the planning region, or in another area to which the individual is willing to commute or relocate.

300 – Occupational Skills Training – Approved Provider - Instruction conducted in an institutional or work site setting designed to provide or upgrade a participant's technical skills to perform a specific job or group of jobs such as auto mechanics, health services or clerical work. This code is to be used when the training provider is an approved provider that is included on the State Eligible Training Providers List (ETPL).
